Design

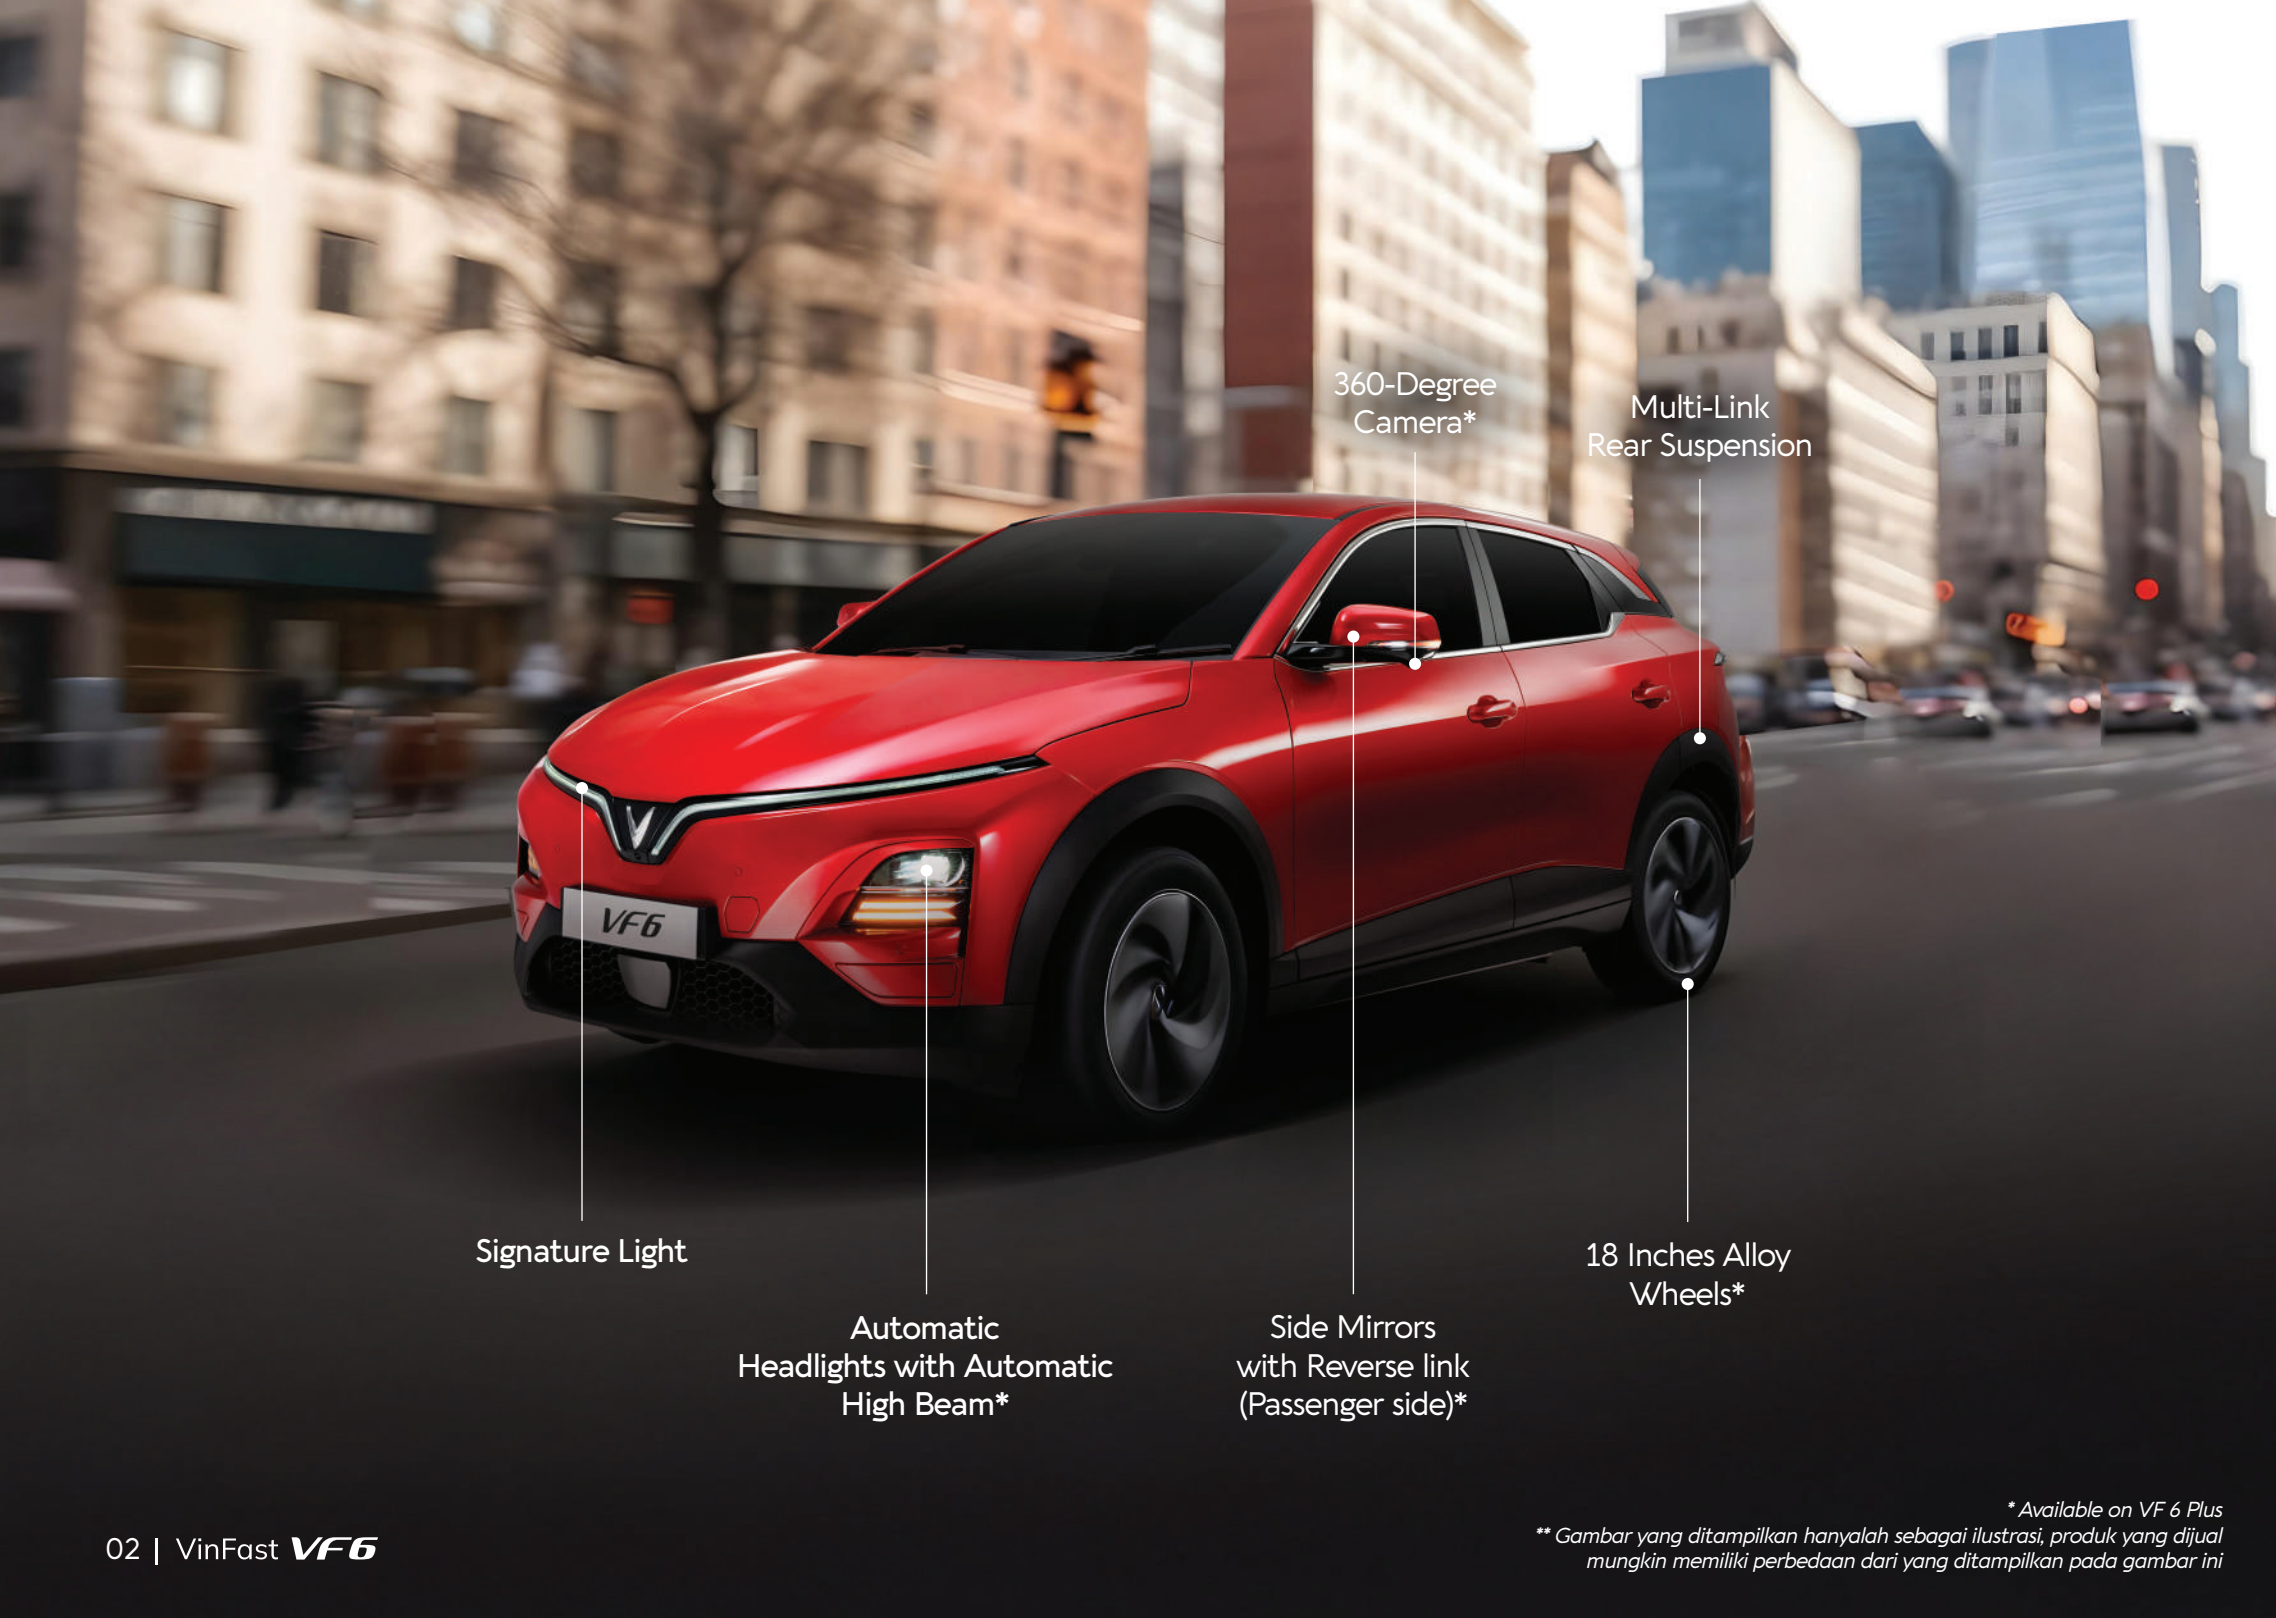

The Duality of Nature

VF 6 hadir dengan desain modern dan futuristik hasil karya desainer terbaik dari Torino Design Studio.

Terinspirasi dari prinsip Duality of Nature, VF 6 dirancang dengan keseimbangan harmonis sentuhan manusia dan teknologi menjadi kesatuan yang indah. Diciptakan untuk keluarga muda yang peduli akan keberlanjutan lingkungan.

Some features are only available via Wi-Fi, others may only be available with a time delay and will be added as a result of a future software update of your vehicle and are subject to a subscription

(5) Valet Mode is a security feature that limits access to certain car functions when the owner entrusts the vehicle to a valet. It is designed to prevent unauthorized access to personal information and limit the car's capabilities (turn off some certain features) while the owner is not present.

(6) With this feature, the system automatically regulates the heating, air conditioning, air distribution and fan speed to keep the interior at the selected temperature. The air conditioning system is powered by the high-voltage battery.

Prolonged operation therefore reduces the range. You are responsible for the safety of your dog or pet. Never leave a child unattended in your vehicle.

(7) Camping mode allows you to power electrical devices via the USB ports and the low-voltage socket after the vehicle has been switched off and to maintain the interior temperature while at the same time conserving your vehicle's battery. The touchscreen remains switched on so that you can listen to music, surf the Internet and play arcade games. This mode is ideal for when you are in the vehicle, for example when camping.
